

Statistics on Banking

A Statistical

Profile of the

United States

Banking Industry

Historical
1934-2001

Closings and
Assistance Transactions

INTRODUCTION

This publication is intended to be a reference and source document for those interested in banking history or in major trends in banking. The publication contains both structure and financial data on insured banks from the inception of the Federal Deposit Insurance Corporation in 1934 to the present. Its primary goal is to provide comprehensive industry data about FDIC-insured depository institutions. A similar publication, *Statistics on Banking*, is published annually and provides detailed data on bank industry condition and performance during the given calendar year.

INTERNET AVAILABILITY

Historical Statistics on Banking is currently available on FDIC's web site, www.fdic.gov. See Bank Data (Historical). The internet version of these data offers the user many additional advantages, such as

- More timely receipt of data and updates
- Ability to download into standard spreadsheets
- Ability to obtain state-level tables

CONTENTS

This publication consists of several distinct components:

Volume I	Insured Commercial Banks, National Level
Volume II	Insured Savings Institutions, National Level
Volume III	Closings and Assistance Transactions

For additional information, refer to the Notes to Users at the end of each volume.

FDIC-INSURED INSTITUTIONS

Insured Commercial Banks - This category includes commercial banks insured by the FDIC through either the BIF or the SAIF. These institutions are regulated by one of the three federal commercial bank regulators (FDIC, Federal Reserve Board, or Office of the Comptroller of the Currency) and submit financial reports to the Federal Reserve (state member banks) or to the FDIC (state nonmember banks and national banks).

Insured Savings Institutions - This category includes savings institutions insured by either the BIF or the SAIF that operate under state or federal banking codes applicable to thrift institutions. These institutions are regulated by and submit financial reports to one of two federal regulators (FDIC or Office of Thrift Supervision).

Data on savings institutions that were placed in Resolution Trust Corporation conservatorship are not aggregated with data on other savings institutions, since conservatorship institutions do not operate as privately held entities and their resolution costs do not accrue to the FDIC. The RTC conservatorship institutions are listed separately as memoranda items where applicable.

EXCLUSIONS

Excluded from this publication are data on commercial banks and savings institutions that are not insured by the FDIC through either the BIF or the SAIF.

DATA SOURCES

The structure and financial data sources used in the preparation of the publication are

Annual Reports of the Federal Deposit Insurance Corporation,
1934-2000
Statistics on Banking, 1981-2000
Assets and Liabilities, Commercial and Mutual Savings Banks,
1934-1982
Bank Operating Statistics, 1968-1982
FDIC Financial Time Series Data Base, 1984-2000

The primary sources of financial data for the publications listed above are (1) the Reports of Income and Condition submitted by FDIC-insured institutions to the federal commercial bank regulators and (2) the Thrift Financial Reports submitted by FDIC-insured savings institutions to the Office of Thrift Supervision. Structure data are based on information that is contained in the FDIC financial institution structure database and is subsequently published in the above publications.

METHODOLOGY

For this data to be as recent and accurate as possible, all data from 1984 to the present have been obtained from the FDIC's Financial Time Series database, which reflects revisions and amendments made subsequent to publication in the hard-copy sources. Data prior to 1984 have been obtained from the other four hard-copy sources listed above. When published data were used, both structure and financial values were obtained from the latest edition reflecting the data for a particular year. For example, the 1965 Annual Report was the source

for much of the 1957 data that appear in this publication. Since not all data, particularly at the state level, were revised and republished in later editions of the sources, multiple sources for the same year had to be used. Using more than one source occasionally results in differences in aggregate values for the data. These differences are not considered significant with respect to the intended use and purpose of this publication.

COMPARABILITY OF DATA

Reporting requirements and instructions have changed considerably over the period covered by this publication. Where possible, adjustments have been made to account for these differences and to make the values adhere as closely as possible to current requirements and instructions. The notes accompanying the tables are an integral part of the publication and provide information on adjustments made to source data and on the reporting differences over time.

LEVEL OF CONSOLIDATION

All data from 1934 to 1973 represent a consolidation of all domestic operations and, where available, operations in what source publications designate "Other Areas." "Other Areas" are represented by Guam, Puerto Rico, U.S. Virgin Islands, and all other U.S. Territories and possessions.

With some exceptions, primarily at the state level, all financial data from 1974 to the present represent the consolidation of domestic and foreign operations, including operations in "Other Areas."

VALIDATION

Every attempt has been made to ensure the accuracy and integrity of the data contained in the publication. Any inconsistency brought the FDIC's attention will be investigated and corrected or explained in future editions.

CONTACT FDIC

Users are invited to submit written comments and content suggestions for future editions.

CLOSINGS AND ASSISTANCE TRANSACTIONS

Field Content

Name

The legal name of the failed institution.

Location

The city and state (or territory) of the headquarters of the failed institution.

Date of Failure

This is the date that the failed institution ceased to exist as a privately held going concern. For institutions that entered into government ownership, such as FDIC Bridge Banks and RTC Conservatorships, this is the date that they entered into such ownership.

Insurance Fund

Prior to 1989, there were two federal deposit insurance funds -- the FDIC fund, which insured deposits in commercial banks and state-chartered savings banks, and the FSLIC fund, which insured deposits in state- and federally-chartered savings associations. In 1989, the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA) specified that the FDIC would henceforth be the sole federal deposit insurer of all banks and savings associations. The FDIC fund was re-named the Bank Insurance Fund (BIF), while the insolvent FSLIC fund was replaced by the Savings Association Insurance Fund (SAIF).

Transaction Type

Failing institutions have been resolved through several different types of transactions. The transaction types outlined below can be grouped into three general categories, based upon the method employed to protect insured depositors and how each transaction affects a failed institution's charter. In most assistance transactions, insured and uninsured depositors are protected, the failed institution remains open and its charter survives the resolution process. In purchase and assumption transactions, the failed institution's insured deposits are transferred to a successor institution, and its charter is closed. In most of these transactions, additional liabilities and assets are also transferred to the successor institution. In payoff transactions, the deposit insurer - the FDIC or the former Federal Savings and Loan Insurance Corporation - pays insured depositors, the failed institution's charter is closed, and there is no successor institution. For a more complete description of resolution transactions and the FDIC's receivership activities, see *Managing the Crisis: The FDIC and RTC Experience*, an historical study prepared by the FDIC's Division of Resolutions and Receiverships. Copies are available from the FDIC's [Public Information Center](#).

Category 1	Failed institution's charter survives A/A Assistance Transaction, includes 13(c) and FAM REP Reprivatization RO Institution closed and reopened
Category 2	Failed institution's charter is terminated, insured deposits plus some assets and other liabilities are transferred to a successor charter P&A Purchase of assets and assumption of liabilities of a failed institution IDT Transfer or assumption of insured deposits of a failed institution

A/M Transfer of failed institution's charter to a successor institution with FSLIC assistance

MGR Failed institution was placed under government control through FSLIC's Management Consignment Program, then transferred to the Resolution Trust Corporation's conservatorship program after creation of RTC in 1989

** Institution placed in Conservatorship

Category 3 PO Payoff of insured deposits, remaining liabilities and assets are liquidated

Charter Class

The FDIC assigns classification codes indicating an institution's charter type (commercial bank, savings bank, or savings association), its chartering agent (state or federal government), its Federal Reserve membership status (member or nonmember), and its primary federal regulator (state charter institutions are subject to both federal and state supervision).

N National charter commercial bank supervised by the Office of the Comptroller of the Currency

SM State charter Fed member commercial bank supervised by the Federal Reserve

NM State charter Fed nonmember commercial bank supervised by the FDIC

SA State or federal charter savings association supervised by the Office of Thrift Supervision

SB State charter savings bank supervised by the FDIC

Total Deposits

The sum of all deposits including demand deposits, money market deposits, other savings deposits, time deposits and deposits in foreign offices as of the last Call Report or Thrift Financial Report filed by the institution.

Total Assets

The sum of all assets owned by the institution including cash, loans, securities, bank premises and other assets as of the last Call Report or Thrift Financial Report filed by the institution. This total does not include off-balance-sheet accounts.
